HUDSON'S BAY STORES

Are just what every
weak, nervous, run-
down woman needs to
make her strong and
well.

They cure those feel-
ings of smothering and
sinking that come on
at times, make the
heart beat strong and
regular, give
sweet, refresh-
ing sleep and
banish head-
aches and nerv-
ousness. They
infuse new life
and energy into
dispirited, health-
shattered women
who have come
to think there is
no cure for them.

They cure Nervousness, Sleeplessness,
Nervous Prostration, Brain Fag, Faint
and Dizzy Spells, Listlessness, After
Effects of La Grippe and Fever, Anemia,
General Debility and all troubles arising
from a run-down system.

ORE TESTS IN THE MILL

And Laboratory—By Theo.
Breidenbach, M.E., Met-
allurgical Chemist.

(Continued from last issue.)

Another fraction not amenable to amalgamation is the "gold in concentrates." Referring to the average role this gold plays in the district, we may say that it is of inferior importance. Ore samples of four-teen working mines gave an average of 1.45 per cent. concentrates, which ran \$27.50 per ton. Consequently one ton of rock contains 33 pounds concentrates worth 45 cents. Of these concentrates you may calculate on extracting by the best machinery but 80 per cent, or 26 2/3 pounds.

Assumed now we unload our 15 ton lot of ore at a well adjusted mill, absolutely adapted for our particular ore. The stamps go smoothly, the silvery surface of the tables shines mildly through the gently moving and evenly distributed pulp, the Wilfley concentrators do their work admirably and the Al amalgamator has nothing to do but to look on until the end of the process. At this time he proceeds to take exactly so much gold in form of amalgam from the plates, as from your ore was precipitated thereon. The concentrates are carefully collected, and finally the certificate is handed over to you reading thus:

Extracted by amalgamation
\$6.05 per ton \$90.75
Concentrates
Assay value \$27.50 per ton;
extracted, 396 lbs. 5.45
Tailings \$3.59 per ton 15 tons 53.80

15 tons of ore, assay value
\$10. per ton \$150.00
This \$6.05 represents all the gold
amalgamable! You will say: "I
expected somewhat more from \$10
ore, still, after all it is not so bad!
The tailings run high but we can
work them by our other means."

Of course you can. But if you think
of working those tailings—only that
have been piled up during the run—that is the coarse part; you will be disappointed. The tailings on pile
run about say, \$2.00, and the gold
not being liberated, the extraction
is difficult and in part only. That
put in comparatively easy and
cheap to work chemically ran off in
the lake, carrying \$1.00 per ton
with it. This \$1.00 would buy all
the horse power you want, all the
material you need for running pur-
chased at 4¢ per ton, the commission

ed slate. As such a custom mill has
mainly work to do only at intervals,
the amalgamator is not a "fixture"
but changes very often, and it may
happen, that he who attends to your
lot is imperfect as well. If he is
middling good it will after a while
strike him that the screens are worn
and that they deliver not any long-
er 30 but rather 20 mesh grain. By
and by it seems to him that grain
and slimes are not being produced in
that proportion he is accustomed to
and tries to remedy this by adjust-
ing the chuck block. There is a large
stream of water flowing over the
tables, sweeping everything down
with great rapidity. The amalgama-
tor reduces the water charge, the
sludge in the mortar thickens, on one
side of the table form themselves
hills of slimes, substantial and rigid,
while on the other side the contracted
and accelerated stream tumbles
over cascades. The attendant does
the lot he ran through yesterday did
his best, he has a busy time of it,
not give him half so much trouble,
but then, the ore looked different!
There appears a spot on the plate,
red like rust. There is another and
another. Each enlarges rapidly to
the size of a square foot. Soon half
the area of the table is friskled.
The amalgamator knows what it is.
He is well aware, that so far as the
surface is covered by the spots, a
malgamation is completely frustra-
ted. Many a wee nugget in conse-
quence, that otherwise would amal-
gamate, slides off the table. It may
not be lost. It may stick in the con-
centrates. Wherever it is, it is a
factor of falsification!

After about ten tons of your rock
have passed the plates, the general
mystery begins to clear up, and at
the time it is tolerably well under-
stood, the last lump rolls under the
stamps. The amalgamator gives the
signal "stop," and thoughtfully ex-
plains to himself: "If the tables had
been more at an incline (or more flat
as the case may be) or if this or
that or the other had been, the clean
up would be certainly satisfactory."

Well, it was a mill test, not an ore
test!

We are far from asserting that the
result of every test is affected by the
consequences of every deficiency here-
in enumerated; there are many not
touched upon here. What we say is,
that one or the other or a group of
them will occur, throwing out of the
character of a test altogether and
leading to figures, fallacious between
extremes.

In a mill pounding only domestic
ore and where the amalgamator is
familiar with the mill and the ore,
such calamities are kept within nar-
row limits. An error made in the
space of 15-ton-time is not any

advisable.

c. Down to what size pulverizing
shall be carried.

d. Whether amalgamation is re-
quired, economically or to dispense
with.

e. What the factors are, acting neg-
ative to successful amalgamation.

f. Whether and how these factors
can be avoided, overcome or annihi-
lated.

g. What the cost of crushing and
amalgamation will amount to.

h. What portion of the ore is to be
treated chemically.

i. Where and when the chemical
treatment is to come in.

k. What constituents of the ore
or causes in general are liable to
impede successful cyanide work.

l. Whether and how these causes
can be re-acted.

m. As to consumption and costs of
material and chemicals

n. As to costs of cyaniding in
total.

o. Whether concentration is indis-
pensable, desirable, advisable, pro-
fitable, where and how it is to be
arranged.

p. As to costs of power and labor.

q. As to total profit in milling.

r. As to amount of gold inevitably
lost.

In these points we refer to those
processes only, of which we believe,
that they are the most economical
and effective ones. Concentration
can be a matter of discussion at but
few localities in the district.

There is not one point in the above
you can dispense with and every one
of them can be given in merely sub-
jecting the ore to a laboratory test.
You will get reliable figures. An ar-
gument against the laboratory re-
sult is, that it is obtained with too
great a precision—an accuracy that
cannot be reached in wholesale mil-
ling. But this plus of accuracy shows
simply, what could be made of your
ore, if treated right and from the
demonstrations in the reports you
learn the nearest way to treat it
right. If in the wholesale milling
the point of accuracy indicated by
laboratory figures cannot be reached,
make some allowance from the be-
ginning, and still there will remain
evidence sufficient on your hand, that
a \$1 ore practically can be treated
at a handsome profit.

If you are painstaking in prepar-
ing your sample, so that it repre-
sents a true average of your ore, so
to both is all that is required for a
complete test. In your certificate of
the mill test you have not one re-
liable figure, I understand, and yet
you treated 15 tons. We admit that
if your sample had been 100 to 500
tons, you would approximately know
the truth in regard to amalgama-
tion. But you would not know any

THE PROMOTION EXAMS.

Names of Public School Pu-
pils Who Have Passed
their Examinations.

List of pupils of the Rat Portage
public schools who have passed their
examinations and will be promoted
providing they return to school at
the beginning of the next term. The
names are in order of merit:

Watchmaker, Jeweller and Optician.
Issuer of Marriage Licenses.

WANTED-By middle of July. Rooms and Board in private family or boarding house, for gentleman and wife, with two boys. Apply to C. W. Chadwick.

WANTED A Furnished Cottage for six weeks, in town or on island near town. Apply, stating terms, at once, to Mrs. Hugh Armstrong, Portage la Prairie, Man.

FOR SALE OR TO LET-5 roomed Cottage, and a 7 roomed 2 story dwelling on Grace Street. Price that will meet competition. Apply to C. W. Chadwick.

Amateur Supplies
A full line of Plates, Papers, Mounts, etc. We also do finishing for Amateurs.

WINTER The Photographer
WINTER'S OLD STAND.

This \$6.05 represents all the gold amalgamable! You will say: "I expected somewhat more from \$10 ore, still, after all it is not so bad! The tailings run high, but we can work them by some other means." Of course you can. But if you think on working those tailings only that have been piled up during the run—that is, the coarse part—you will be disappointed. The tailings on pile run about say, \$2.00, and the gold not being liberated, the extraction is difficult and in part only. That portion, comparatively easy and cheap to work chemically, ran off into the lake, carrying \$1.60 per ton with it. This \$1.60 would buy all the horse power you want, all the material you need for running purposes and do all the repairing required. If we do not want to waste the gold, we must apply a method that in few and economical operations—amongst which amalgamation need not necessarily have a place—will treat and exhaust every pound of the ore.

Our tests have been made under the supposition that we commanded an ideal mill, specially set up for our purpose, a mill in which sources of error do not exist and intricacies are impossible. Such a proposition is false, therefore the result of the test is a dream! In order to be practical, let us try another lot, in every respect equal to the first one, and unload it at a mill, as we know them—imperfect, like everything else in this world.

It is a custom mill, dealing with all sorts of ore, from the real hard quartz, down to the altered granite, the bleached green stone and decayed.

Extracted by amalgamation—\$2.85 per ton—clearly indicating that it was only the liberated gold of the coarse portion—namely the 57 per cent—which was caught. If there was a chance to catch more, there was as well the possibility to catch less than that. If you are given to take chances, what was the test made for?

After all, what do you know more than you did before, when a mill test, good or bad, is made?

You know only what a particular mill has been able to do with your ore? Another mill might have been able to do better?

A particular mill has been able to do with your ore? Another mill might have been able to do better?

If an ore test is made, it should answer conclusively the following questions:

1. What mechanical and chemical operations have to be involved, in order to "exhaust the ore of practically all its gold?"

2. Can these processes profitably be applied?

Suppose these questions can be answered satisfactorily and positively at the end of the test, then the following information obtained in the course of testing will show the way of accomplishing the task on a whole-sale scale:

a. Which principle of crushing preferably to follow—stamping, rolling, or grinding.

b. Whether dry or wet crushing is

the nearest way to "treat it right. If in the wholesale milling the point of accuracy indicated by laboratory figures cannot be reached, make some allowance from the beginning, and still there will remain evidence sufficient on your hand, that a \$1 ore practically can be treated at a handsome profit.

If you are painstaking in preparing your sample, so that it represents a true average of your ore, so to 1000 is all that is required for a complete test. In your certificate of the mill test you have not one reliable figure, I understand, and yet you treated 15 tons. We admit that if your sample had been 500 to 500 tons, you would approximately know the truth in regard to amalgamation. But you would not know anything else, but far less and nothing more certain, than a laboratory test would have revealed in shorter time, with less trouble and at much lower costs.

If you have been forced by a poor mill run to place your mining location in the rear—you may have done so to the detriment of the district and your own—look at your ore again.

What are you going to do with a result, that evidently is pending in a thick cloud of doubt? Do you take it for granted, that you know sufficient to justify discarding your property? It seems to be all that is left to do, because one item of your certificate reads thus:

"Extracted by amalgamation—\$2.85 per ton," clearly indicating that it was only the liberated gold of the coarse portion—namely the 57 per cent—which was caught.

If there was a chance to catch more, there was as well the possibility to catch less than that. If you are given to take chances, what was the test made for?

After all, what do you know more than you did before, when a mill test, good or bad, is made?

MAJORITY DOWN TO ONE.

Judge McLennan Declares Carscallen Elected—Ross Majority Drops to 1.

Toronto, July 2.—The Ross government now has a majority of one in the house, with North Renfrew seat vacant.

The majority was reduced from 3 by the decision of Judge McLennan, in the Lennox case given out this morning. The judge ruled that a ballot marked for Madole with a circle instead of a cross and allowed by the county judge was improperly counted, and that two ballots marked for Carscallen which were ruled out should have been counted. The changes give Carscallen, the Conservative, a majority of 3.

Judgment was given also by Judge McLennan in the North Grey case, maintaining MacKay, Liberal, in the seat by two majority.

Miss Christy of Winnipeg is spending her summer holidays here, the guest of Mrs. D. C. Cameron.

The Gold Panner mine trustees have a deal on with eastern capitalists for the sale of the property. They are expected here almost any day now.

Mr. George Killam, son of Judge Killam, arrived this evening to spend a few days on the lake.

Miss Lucie Greaves has returned from a visit to her old home in the east.

Mercur, Linda Hallet, Lillie Campbell, May Philbin, Lottie Dalziel, Georgina Pope, Gertie Thompson, Willie Archambault, Louise Malush, Lloyd Smith, Israel Goodwin, Gertie Ferrier, Ethel Baker, Harry Rager, Bertie Pitts.

Miss Davis' Class—From Jr. 11 to Sr. 11—Myrtle Clark, Eva K. Bhea Neads, Edwin Millward, B. B. Mc Cormick, Ture Anderson, J. Joe Gould, Grace Jones, Garm, Kinon, Charlie Bunyng, Ethel J. Hams, Josie Booker, Willie Myles, Marguerite Larkin, Alex. Fidler, Lottie Archdekin, Leonard Pitts, Robby Brydson, Lily Mercer, George Myles, Willie Guernsey, Lindsay W. Hainson, Alice Whitaker, Helen Baxendale, Archie Cameron, Violet Morris, Inley, Fred Gilhuly, Beatrice Keidall, James Ried, Willa Campbell, Nina Kendall, Dolly Adams, Elmer Fullerton, Maggie Frost, Horace Merrier, Juha McLeod, Willie Thompson, Herbie Foster, Alma McUlloch.

Miss Wilkinson's Class—Jr. 11 to Sr. 11—Frank Munnell, Lulu Lamphire, Mervin Sharpe, Kenneth Campbell, Ethel Guernsey, Ber. Clarke, Tom Bunn, Clara Foster, Charley, Norbert, Alice Hall, P. J. Graham, Beryl Austin, Jessie E. guson, Howard Myers, Charlie Link later.

Miss McLean's Class—Sr. 11 to Jr. 11—James Robertson, Beatrice Watson, Harvey Rochester, Beresford Ferguson, Kathleen Kingdom, Ebbie Stendall, Grant Nairn, Ethel McCreight, Louise Melish, Ivan Wilson, Agnes McLachly, Bobbie Spence, Edna Brydges, Beatrice Melish, Eileen McMurphy, Nellie Delbridge, Vera Gamble, Maggie Coutin, Mable Myles, Nancy Anderson, Jar. Frost.

Miss Forster's Class—Pt. 1 to 11—Eddie Myles, Mabel Milwa, Frank Kelly, Frank Moore, Gert Baxter, Stewart Moore, Geo. Stephen, Alva Myers, Jack B. Charlie Lawson, Arthur H. Mabel Tew, Asie Williams.

North Ward—Pt. 11 to 11—Pe White, Frances Alcock, Let. St. Lucy Williams, Winnie White.

Pt. 1 to Pt. 11—Amy Guernsey, Mable MacKenzie, Jean Pickett, Fred Parsons, Ruth E. Dorothy Hall, Fred H.

Jr. 11 to Sr. 11—Walter Fayer, Jeffrey McLennan, Eva White, Amy Alcock, Maud Bryde, Stanley Guernsey, Lucie Guernsey, Pearl Stanton.

South Ward—Pt. 11 to 11—Gerda Elhasson, Esther Elhasson, May Johnson, John Anderson, Annie Cameron.

Mr. G. M. Rioch is able to attend to business now, having almost completely recovered from the results of the accident which occurred about five weeks ago.

Crispi's Narrow Message.

The Courier des Etats Unis says
that on Jan. 14, 1858, the late Francis-
co Crispi, the great Italian statesman,
then a political refugee in Paris, re-
ceived from an Italian friend connect-
ed with the Paris opera two gallery
tickets for the performance of that
evening, which the emperor and em-
press were expected to attend. Crispi
and his wife were on the point of start-
ing for the theater when the latter ex-
claimed, "Francesco, where shall we
get a candle?"

They were in such destitution that
they had neither candles nor matches
nor yet the wherewithal to buy them.
Going to the opera would involve grop-
ing for their room at midnight and go-
ing to bed in total darkness. Too proud
to confess their condition and to bor-
row a few sons, they regretfully denied
themselves the promised treat, remain-
ed in their room and retired before the
twilight had faded.

On the following morning they learn-
ed of Orsini's attack on the emperor,
the police raids and the arrest of all
Italian revolutionists found in or near
the theater. If Crispi had been in the
house, he would certainly have been
among the first arrested, for he was
known as an ardent disciple of Mazzini.

Division General Poor Speller.

"When I was in the civil war," said
General Grosvenor, "I had a division
commander who was the finest look-
ing man on a horse you ever saw. He
was a good soldier, too, but he had
some educational deficiencies. One day
he thought to drill his division. After
some maneuvering he got them lined
up in column of fours to start.

"The proper command is 'Column,
forward.' The general didn't know
this, and he waved his sword in the
air and yelled 'Column.' Not a man
moved. The general had a voice you
could hear half a mile. He stood up in
his stirrups and yelled again, 'Column.'
Still there was no move. Then he
turned his horse and dashed back to
the soldiers.

"What's the matter?" he shouted, so
loud that everybody on the parade
ground could hear him. 'Can't you un-
derstand when I give a command? Col-
umn! Column! I'll spell it for you,
you idiots—C-o-l-u-m-n!'

Strange Effects of Extreme Cold.

Dr. Moss of the English polar ex-
pedition of 1875-77, among many other
things, told of the strange effects of the
extreme cold upon the candles they
burned. The temperature was from 35
to 50 degrees below zero, and the doc-
tor says he was considerably discour-
aged when upon looking at his candle
he discovered that the flame "had all it
could do to keep warm." It was so
cold that the flame could not melt all
of the tallow of the candle, but was
forced to eat its way down, leaving a
sort of skeleton candle standing. There
was heat enough, however, to melt odd
shaped holes in the thin walls of tal-
low, the result being a beautiful lace-
like cylinder of white, with a narrow
tongue of yellow flame burning on the
inside and sending out many streaks of
light into the darkness.

Eating Seals in England.

The water bailly of London brought a
"quick" seal to court, receiving 26
shillings 5 pence (1530), and in the same
year the item "for bringing a cele" 15
shillings occurs. Seals were eaten,
though they may have been kept as a

English Free School Rules, 1734.

Impetuous, Whatsoever Boy comes to
School past 7 o' th' Clock in the Morn-
ing in Summer time and past 8 o' th'
clock in ye Winter time [without Shew-
ing good reason] Shall receive 3 Lash-
es.

Item, Whosoever absents himself
from School, Either by Truancy, by
trying to stay at home, or otherwise;
Shall incur his Master's highest dis-
pleasure, Suffer the hissing and Scott-
ing of ye whole School, Tarry behind
the Rest one hour at Night for a week,
and besides [as a suitable Reward for
his—] shall suffer 12 Lashes.

Item, Whatsoever Boy shall at any
time Curse, Swear, or take the Lord's
Name in vain, Shall assuredly suffer
for such offence, 15 Lashes.

Item, What Boy soever addicts him-
self to Obscene Talking or foolish Jest-
ing, shall Suffer for each such Trans-
gression.

Item, What Boy soever absents him-
self from the Service of Almighty God
on the Sabbath day, and spends that
Day in a wicked man'er in playing &
running about, Shall receive 20 Lashes.

Item, Whosoever steals from or de-
frauds his School-fellow of Ink, Pens,
Paper, Quills, or any Other Thing
Whatsoever, Shall certainly, when
found out and detected, receive 9 Lash-
es.

The Reporter's Revenge.

"Do you see that man?"
And I observed a rather Jonesome
person wandering aimlessly about the
capitol. Regret was stamped upon his
face, and his whole attitude was that
of a man who had tried and failed and
who had no intention of every trying
again.

"Well, that is a former representative
who called the correspondent of the
leading paper in his district a liar. The
correspondent did not pursue the ordi-
nary method of retaliation by attack-
ing him in his articles whenever op-
portunity offered. He simply refused
for two years to mention his name in
his correspondence. The people at home
began to wonder what they sent a
man to congress for anyway and final-
ly came to the conclusion that a repre-
sentative who could not get his name
in the paper could not be of much ac-
count in Washington. It took 1,400 bal-
lots to beat him when he came up for
renomination, but they did it all right."
—Washington Cor. New York Herald.

Cheap Living in Mexico.

"Mexican laboring men," says a man
who has been visiting in Mexico, "work
for 12 cents a day. This may seem in-
credible, but it is a fact. You see more
copper cents in that country and more
are used, perhaps, than in any country
on the globe. It is not uncommon to
see a Mexican woman go to market
and buy a cent's worth of wood, a
cent's worth of corn or coffee and a
stalk of cane. She will make a fire in
the center of her adobe house and pre-
pare a meal for the family. They eat
cane as we would an apple. The ox
cart and wooden plow are still in use.
The ox teams are harnessed so the
pressure of the load comes upon the
head, just in front of the horns, instead
of the shoulder and neck."

Captured Big Game.

In one of the St. Louis Sunday
schools the classrooms are separated by
glass partitions. A St. Louis paper
says that during a session of the school
one of the teachers was much annoyed

to 50 degrees below zero, and the doctor says he was considerably discouraged when upon looking at his candle he discovered that the flame "had all it could do to keep warm." It was so cold that the flame could not melt all of the tallow of the candle, but was forced to eat its way down, leaving a sort of skeleton candle standing. There was heat enough, however, to melt odd shaped holes in the thin walls of tallow, the result being a beautiful lace-like cylinder of white, with a narrow tongue of yellow flame burning on the inside and sending out many streaks of light into the darkness.

Eating Seals in England.
The water bailly of London brought a "quick" seal to court, receiving 20 shillings 8 pence (1530), and in the same year the item "for bringing a cele" 15 shillings occurs. Seals were eaten, though they may have been kept as a curiosity. One was presented to Cromwell, Wolsey's successor in Henry's favor, though it died before he could have derived much pleasure from it. Perhaps he ate it. At Henry VII's wedding feast in 1487 one of the dishes was "seyle in fenyng, entirely served richly," and very rich it must have been. In Cromwell's accounts for 1537 William Wodehouse's servant brings a porpoise, and porpoises we know are eaten.

Highdown Language.
In the east the flow of language in praise of rulers is sometimes wonderful. The Burmese greeting Lord Curzon, viceroy of India, at the Royal lakes, declared that "his glory shines resplendent as the orb of day, his intellect is as farreaching as the lightning. May he be as glorious as the sun and moon!"

The Prince of Wales was extolled by an oriental subject as "great thief" under the impression that this was the highest possible compliment. Another monarch was named "the protector of all vegetables, regulator of the seasons, absolute master of the ebb and flow of the sea."

Only One Clean Thing.
When Jones was at Oxford, he was a most excellent fellow, and had only one enemy—soap. He was called Dirty Jones. One day the wag Brown went into his rooms and remonstrating with him on the untidy, slovenly and dirty state of everything said: "Upon my word, Dirty, it's too bad. The only clean thing in your room is the towel!"

First Fruits.
Kindergarten—Children, this morning I have a surprise for you. I have brought a lovely big rubber plant for us to have in our room, and every day we will water it and—Grace—Oh, Miss H., can't I have the first pair of rubbers?

Executive Ability.
Little Clarence—Pa, what is executive ability?
Mr. Callipera—Executive ability, my son, is the capacity for making some one else paddle your canoe for you.—Judge.

An Obedient Lesson.
"Oh, mamma, here's a chocolate."
"Yes, my dear. Now name me two other kinds of pots."
"Potatoes and cognacbrandy."—Lillo.

for 12 cents a day. This may seem incredible, but it is a fact. You see more copper cents in that country and more are used, perhaps, than in any country on the globe. It is not uncommon to see a Mexican woman go to market and buy a cent's worth of wood, a cent's worth of corn or coffee and a stalk of cane. She will make a fire in the center of her adobe house and prepare a meal for the family. They eat cane as we would an apple. The ox cart and wooden plow are still in use. The ox teams are harnessed so the pressure of the load comes upon the head, just in front of the horns, instead of the shoulder and neck."

Captured Big Game.
In one of the St. Louis Sunday schools the classrooms are separated by glass partitions. A St. Louis paper says that during a session of the school one of the teachers was much annoyed by loud talking in an adjoining room. At last, unable to bear it any longer, he mounted a chair and looked over the partition. Seeing that one boy who was a little taller than the others was talking a great deal, he leaned over, hoisted him over the partition and banged him into a chair in his room, saying, "Now be quiet!"

A quarter of an hour later a small head appeared round the door, and a weak, scared little voice said: "Please, sir, you've got our teacher."

Cooking Fish.
Boll haddock and codfish six minutes for every pound; bass, salmon and halibut ten to fifteen minutes. A lobster, as a rule, requires half an hour to forty minutes. Large fishes should bake about one hour and small ones twenty to thirty minutes. Broiling requires a quarter to half an hour, according to the size of the fish, very small specimens being finished in five to ten minutes.

The Last Straw.
Mrs. Muggins—My husband is a perfect crank.
Mrs. Boggins—All husbands are, my dear.
Mrs. Muggins—But fancy a man who complains that my mustard plasters are not as strong as those his mother used to make!

No Women Admitted.
Malwatchin, on the borders of Russia, is the only city in the world peopled by men only. The Chinese women are not only forbidden to live in this territory, but even to pass the great wall of Kalkan and enter into Mongolia. All the Chinese of this border city are exclusively traders.

Gloomy Even Then.
Hook—Blazes is the most melancholy fellow I know.
Nye—That's right. He proposed to a girl once by asking her how she would like to be his widow.

His Scheme.
Friend—Why do you wear those fearfully old fashioned collars?
Winklers (a man of affairs)—Because when the washerwoman sends them to anybody else they send them back.

A Good Provider.
"Is your husband a good provider?" asked the syncretistic child.
"Indeed he is, mum. He got me three new places to wash last week."

THE GLASGOW HOUSE

THE GREAT MID-SUMMER SALE.

On July 4th

We will commence our Annual Mid-summer Clearing Sale. This sale as a rule should not come off until July 23, but owing to the backward weather in June our stock is much heavier than it ought to be at this season, we have determined that this month's selling will break all records in our business. You know it is the best stock of merchandise in this district you have to choose from. The quantities are abundant and the assortment is just at its best. **THIS CHANCE FOR ECONOMICAL BUYING IS TOO GREAT TO MISS. DON'T FAIL TO GET HERE. THE SAVING IS GREAT.**

DRESS GOODS SALE.

All our 50 and 60c. Dress Goods go on sale at 35c.
All our 75c. Dress Goods go on sale at 50c.
All our 1.00 Dress Goods go on sale at 70c.

Every yard of Dress Goods will be reduced during this sale.

WASH GOODS—300 pieces our best English Prints that are the very best value at 14c., on sale at 10c. 78 pieces best quality Blouse Prints 12c. for 8c.; 300 yards Navy Blue Blouse Sateens, 15c. for 11c. All Muslin, Lawns, Gingham and Chambrays, at big reductions during this sale.

Some Astonishing Values in Staples.

84 Bleached Sheetings 30c. for 22c.; Gingham 15c. for 12c.; Flannelette 10c. for 7c. During this sale we will give astonishing values in Sheetings, Towels, Towelling, and Table Damasks.

BLOUSES All our magnificent stock of Summer Blouses will be cleared out during this sale. Muslin, Lawn, Print and Percale Blouses, all this Season's Styles greatly reduced in price.

LADIES' WHITE SAILORS. Sun Shades and all Children's Trimmed Hats must be cleared out at this Midsummer Sale.

WHITEWEAR SALE.

Ladies White Skirts, Gowns, Corset Covers, Chemise and Drawers—Our stock at present is very complete, and all must be cleared this month. Our prices will do it.

There is no denying the fact that we have the best stock of **MEN'S HATS** in this town—the trouble is we have too many of them, especially in Light Greys. The weather is just here for these goods, but we wish to make a quick sale of them:

All our Best \$3.00 Fedoras for \$2.00.

All our \$2.00 Fedoras for \$1.25.

All our Summer Underwear, Neglige Shirts, Flannel Suits, etc. at Clearing Prices for July.

Special Dressmaking Prices for July.

During this sale we will make up the following Garments at greatly reduced prices. Strictly first-class workmanship in every Garment.

Skirts Made Up in First-Class Style	\$2.50.
Muslin Dresses	3.50.
Tailor-Made Suits	6 00.

Marvellous Escape From Death.

Paine's Celery Compound
Does a Wondrous Work For Mr. Geo. March,

After Failures of Other Medicines.

It is well known that terrible rheumatism and sciatica cause more helplessness, acute suffering and agony than any of the other diseases that afflict humanity. The great medicinal virtues of Paine's Celery Compound make it the only trustworthy specific for the cure of all forms of rheumatism. Thousands of strong testimonial letters from the most prominent people prove that Paine's Celery Compound has completely banished rheumatism when all other treatment has failed. Mr. George March, Victoria Ave., North Hamilton, Ont., says:

"Having experienced all the pains and agonies of that awful disease rheumatism for the past ten years, and having met with so many disappointments after using medicines of all kinds, I consider it a duty to let suffer men and women know what Paine's Celery Compound did for me when in a very low state of health."

"I was strongly recommended to give Paine's Celery Compound a fair trial for my troubles. I bought it and used it, and the results were simply marvellous."

"I was encouraged and overjoyed that I had at last found the medicine that could cure even such a long standing case as mine. I continued the use of the Compound, and find myself a new man in every respect. Paine's Celery Compound also banished pains and troubles that I experienced in the region of my kidneys. I consider Paine's Celery Compound my health-giver and life-preserver."

Mortgage Sale
Town Property

Under and by virtue of a certain indenture of mortgage which will be produced at the time of sale, there will be offered for sale by public auction by Robt. J. Perrott, Auctioneer, at the Russell House, in the Town of Rat Portage, in the Province of Ontario, on Saturday, the 19th day of July, A.D. 1902, at the hour of two o'clock in the afternoon, the following property:

Lots 3 and 4 in block 1 in the Town of Rat Portage, as shown upon a plan of said town certified by John W. Harris, Provincial Land Surveyor, and registered in the registry office for the District of Rainy River at Rat Portage.

The vendors are informed that there is erected upon said land a substantial two and one-half story 10-roomed dwelling-house upon a stone foundation, 24x17 and 10x17, the building being L shaped.

The property will be offered for sale subject to a reserved bid.

Terms: Ten per cent. of the purchase money to be paid in cash at the time of sale and the balance on conditions to be made known at the time of sale. For further particulars apply to Messrs. Atkins, Pittblado, Robson & Loftus, Vendor's Solicitors, Winnipeg, Man.

Dated at Winnipeg this 28th day of June, A.D. 1902.

What a Widow is.
It was a Sunday school class, and the teacher believed in asking questions to see how clearly the scholars understood their lessons. The widow of Ham was the subject, and the teacher thought she would be quickly answered when she asked, "What is a widow?" There was a silence until she nodded to the small boy at her left and said, "You know what a widow is, don't you?" for she knew the boy's mother was one.

"Yes," he answered; "it's a lady what takes to washing."

From now until July 15th we will hold a Special Sale of Blouses, and all lines will be reduced. Note following Prices:
